

**Cross-Border Payments · Consulting · Technology**

## **Building the infrastructure behind the world's connected payments.**

Money should move as effortlessly as information. BNGS develops the payment infrastructure that makes this possible: connecting countries, institutions, and technologies through real-time payment rails, UPI integrations, regulatory compliance, certification, and purpose-built applications.

We partner with banks, fintechs, and governments to create payment ecosystems that are trusted, scalable, and ready for the future.

## **Who We Are**

### **Your partner in navigating the complexity of cross-border payments.**

Badami NextGen Solutions (BNGS) helps banks, governments, fintechs, and financial institutions build, connect, and scale modern payment ecosystems. We specialize in the most complex part of payments where domestic systems meet international networks, regulations intersect, and interoperability becomes mission-critical.

With deep expertise across real-time payment systems, cross-border corridors, scheme integration, compliance, certification, and payment technology, our team brings hands-on experience gained from delivering payment infrastructure across multiple markets. We don't just provide strategic advice; we design, integrate, certify, and operationalize the systems that keep money moving.

From enabling a bank to connect with a new payment corridor, supporting a fintech through certification, or partnering with governments on national payment initiatives, BNGS serves as a single, accountable partner from strategy and implementation to go-live and long-term support.

## **What We Do**

**Three areas of expertise. One goal: payments that perform.**

Every engagement is built around a measurable outcome, not billable hours. Whether it's launching a cross-border payment corridor, achieving certification, or delivering a production-ready platform, we combine strategy, technology, and execution to help payment ecosystems move forward with confidence.

## **Cross-Border Payment Solutions**

We enable seamless international payments by connecting financial institutions to modern payment networks and real-time payment rails.

- Cross-border payment infrastructure
- Global banking and scheme integrations
- UPI and real-time payment enablement
- P2P and P2M payment flows
- FX, settlement, and transaction support

## **Payment Consulting & Advisory**

From strategy to certification, we help organizations navigate the technical, operational, and regulatory complexities of modern payments.

- Payment ecosystem and corridor strategy
- Scheme onboarding and certification support
- Go-live planning and implementation
- Regulatory, risk, and compliance advisory
- Dispute and transaction lifecycle frameworks

## **Application Development**

We build secure, scalable payment applications designed for high-volume, mission-critical financial environments.

- Custom fintech applications
- API, switch, and payment gateway integrations
- Mobile and web payment platforms
- Platform modernization and automation
- Deployment, maintenance, and ongoing support

## **How We Deliver**

### **End-to-end isn't a promise. It's how we work.**

Building a payment ecosystem requires more than technology, it demands seamless execution across integration, certification, compliance, and ongoing operations. BNGS provides

end-to-end delivery, ensuring every stage is aligned, every dependency is managed, and every solution is ready for production.

## **Integrate**

### **Payment Integrations**

We connect banks, payment schemes, switches, fintech platforms, and third-party providers through secure, reliable, and standards-compliant integrations.

## **Certify**

### **Testing & Certification**

From structured testing to scheme certification, we help you meet technical and operational requirements with confidence, reducing risk before go-live.

## **Resolve**

### **Dispute Management**

We design dispute and chargeback workflows that are efficient, compliant, and built into your payment operations from day one.

## **Comply**

### **Compliance Support**

Navigate evolving regulatory requirements with expert guidance across payment schemes, industry standards, and central bank frameworks.

## **Operate**

### **Managed Services**

We provide ongoing monitoring, maintenance, optimization, and operational support to keep your payment ecosystem secure, resilient, and performing at scale.

## **Why BNGS**

**Trusted for expertise. Chosen for outcomes.**

## **Proven Cross-Border Expertise**

Our experience is built on delivering real payment infrastructure, from cross-border corridor launches and scheme integrations to certification and production deployment. We understand the challenges because we've solved them.

## **02**

### **A Strong Global Payments Network**

Our relationships across banks, payment schemes, regulators, and financial institutions help accelerate collaboration, streamline integrations, and reduce the time it takes to bring payment initiatives to market.

## **03**

### **One Partner. End to End.**

From strategy and solution design to implementation, certification, go-live, and ongoing operations, we provide a single team with end-to-end accountability, eliminating unnecessary complexity and vendor coordination.

## **04**

### **Enterprise Expertise. Right-Sized Delivery.**

Access senior payment specialists without the overhead of large consulting firms. Whether you're launching a pilot or delivering a national-scale payment program, we tailor our engagement to match your goals, timeline, and budget.

## **Industries We Serve**

**Powering the institutions behind modern payments.**

**Banks**

**CONNECT**

Enable seamless cross-border payments with payment corridor connectivity, scheme integration, certification, and real-time payment infrastructure.

## **Fintechs**

### **INNOVATE**

Accelerate growth with secure payment platforms, API integrations, compliance support, and scalable fintech solutions built for production.

## **Governments & Public Institutions**

### **TRANSFORM**

Support national payment initiatives, digital financial infrastructure, and financial inclusion programs through strategic advisory and end-to-end implementation.

## **Enterprises & MSMEs**

### **GROW**

Deliver secure payment acceptance, system integrations, and tailored payment solutions designed to grow with your business.

## **Get in Touch**

**Tell us where you want your payments to go. We'll help you get there.**

Every successful payments journey starts with the right conversation. Whether you're planning a new cross-border corridor, preparing for certification, modernizing your payment infrastructure, or exploring a new idea, our team is ready to help you define the path forward.

**Let's start the conversation.**
